

Department: Public Works

Department Overview

As the name implies, Public Works keeps the Town's facilities working to serve the public. From the streets to the riding paths, parks to the water tanks, buildings to signs, sewers to capital projects; Public Works fixes, upgrades, replaces, refinishes, cleans and otherwise maintains all Town-owned public property. Public Works staff strives to ready our everyday surroundings—from setting up buildings for public meetings, painting street markings in the early hours before traffic builds, or designing new projects from our Town Hall office.

Staff: Terry Burden - Public Works Director; Blake Summers - Assistant
